Related Applications

The examiner notes that there are several related applications which disclose and claim similar subject matter to the instant application. In the interest of thorough examination of the application claims, applicant is respectfully requested to provide the examiner with a complete listing of all applications containing a similar disclosure, as well as an indication of which applications contain claimed subject matter which may be specifically relevant to the pending claims of the instant application.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 40-60 and 63 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-15

Art Unit: 3739

of copending Application No. 09/699,215. Although the conflicting claims are not identical, they are not patentably distinct from each other because the use of a focused ultrasound.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Marcus et al ('484), Sherman et al ('280), Negus et al ('848) and Stasz ('281) disclose various other catheter devices which include an ultrasonic transducer used to ablate tissue. Cain et al disclose a focused ultrasound system for ablating cardiac tissue. Veazy et al ('867) and Kline Schoder et al ('580) disclose ultrasonic systems for delivering more than one ultrasonic frequency for the treatment of tissue. Neither discloses the use of two different frequencies at different times.
